

PAVANKUMAR N

SOFTWARE DEVELOPER

📍 Bengaluru, India 📞 +91 9900300380 ✉ npavankumar066@gmail.com  [LinkedIn](#)

Dedicated and results-driven developer with over 2.7 years of experience at Infosys, specializing in AEM 6.5, Java, and React.js. Skilled in creating secure, high-performing, and scalable websites, with a proven ability to deliver solutions that enhance user experience and meet business objectives. Excels in collaborative environments and is eager to contribute technical expertise to innovative projects in a challenging role.

PROFESSIONAL EXPERIENCE

INFOSYS

Systems Engineer

BENGALURU

10/2022 – 05/2025 (currently serving notice period)

PROJECTS

Migration Project - CMS

- Contributed to the Sitecore-to-AEM migration by customizing core AEM components and creating modular templates to meet client-specific functionality and enhance content consistency.
- Developed custom components utilizing Sling Models and services for dynamic data processing and built Sling servlets to manage external API calls for real-time data integration.
- Implemented Google Maps API within a custom AEM component to improve user experience, presented demos of multiple components to the client for feedback and iterative improvements, and utilized GitHub for version control, committing and merging changes from local development setups.

Migration Project - DAM

- Worked on the migration project from OpenText to Adobe Experience Manager (AEM) for a gas and electric company, focusing on efficient data handling and asset management.
- Developed a custom script to format CSV files and enrich metadata for AEM's Bulk Importer tool, facilitating large-scale asset migration.
- Engineered a robust scheduler job in AEM to verify and track incoming client server files, enhancing reliability and minimizing manual intervention, while integrating validated assets into AEM's Digital Asset Management (DAM) for secure storage and accessibility.
